FOR IMMEDIATE RELEASE, MARCH 2010

Mill Log Marine Announces Haxby Speed & Marine as a Dealer for BCS Marine Steering Components

Mill Log Marine, Burnaby, BC (www.milllog.com) is pleased to announce that Twin Disc owned BCS Marine Hydraulic Steering Components (www.bcsmarine.com) are now available through Haxby Speed & Marine in Vancouver, British Columbia.

“The range of BCS steering components available through Mill Log Marine is quite impressive and covers a large spectrum of watercraft ranging from large work-boats to pleasure craft and fits nicely with my focus in the marine market”, added Alex Haxby, President, Haxby Speed & Marine. “By partnering with Mill Log Marine, we now can offer our customers the highest quality steering components on the market today.”

Don Lindsey, Director of Sales & Marketing for Mill Log Marine stated: “We have worked with Alex for several years and have always been very impressed with Alex’s professionalism, tenacity and customer focus.” “Furthermore, we look forward to supporting our local market by offering replacement helm pumps and steering components through Haxby Marine for the older obsolete components not being built any longer.”

BCS is today a leading company in the manufacturing and worldwide distribution of high quality marine equipment, established in 1956, BCS has a full line of Marine Steering Components to include helm pumps, DC pump sets, cylinders, and related components for both pleasure and heavy-duty commercial vessels.

Mill Log Equipment Company based in Coburg, Oregon with North American operations in Burnaby, British Columbia, Kent, Washington, and Edmonton, Alberta, is a heavy-duty transmission and component supplier to the marine and industrial markets offering a complete line of Twin Disc off-highway power transmission equipment, including marine transmissions, electronic controls, as well as steering and propulsion systems.
